HOW WE IMPLEMENT OUR PURPOSE

To enhance and diversify the field of architecture by enticing, exciting, and encouraging students of color and minorities to pursue a career path within the architecture profession.

STRATEGY

Hosting focused workshops, site visits, and hands-on development.

VALUE

To encourage the younger generation of color and those who identify as such. To pursue a career in architectural design.

MEASURE

We offer internships and scholarships for architectural education to students in our program.

Diversity in architecture is important because it will allow architects to be a part of the communities they are designing for. It allows professionals to get to know and connect with minority groups, which is a need in the field of Architectural design.

If we can increase diversity in architectural design field. We can change the perception of the architectural world. It'll make the profession seem more attainable or encouraging for those from minority cultures.
